OVERVIEW

The Azibuye Story

Azibuye comes from a Nguni word that means:

Let them return. Come back. Reclaim what is yours.

We chose that name deliberately because everything we do is an act of restoration. Every skill we teach, every certificate we issue, every learner who crosses our graduation stage is reclaiming something the system once tried to take from them: their right to be seen, valued and economically active.

We exist to open doors, build capabilities and create pathways to opportunities for South Africa's most deserving communities.

“

**Come back,
reclaim what
is yours.**

MEET THE FOUNDER

Dr Maseru Mkhwane

Digital Transformation Specialist
Social Entrepreneur
Community Builder

- phD(Digital Transformation)
- B Tech (Travel & Tourism)

NATIONAL VISION

OUR FOUNDATION

OUR VISION

A South Africa in which every person, regardless of the postcode of their birth, has access to the education, skills, and dignity they need to build a life of meaning.

OUR MISSION

To deliver accredited, human-centred skills development that restores dignity, builds professional competence, and creates sustainable economic pathways for South Africa's most deserving communities.

OUR VALUES

These are not words on a wall. They are the operating instructions for everything we do.

HUMAN DIGNITY

We treat every learner as a complete human being with a history, with potential, and with the right to be taken seriously.

UBUNTU

What we give to one learner ripples outward into their family, their community, their generation.

EXCELLENCE

We hold our programmes, our facilitators, and our outcomes to the highest standards.

Our accreditation is a promise, not a decoration.

INTEGRITY

We operate transparently.

Every learner and every corporate partner knows exactly what they are getting, why, and how.

OUR TWO PILLARS

TWO ARMS. ONE PURPOSE.

Azibuye Digital Technologies operates across two distinct but deeply connected divisions.

Each one speaks to a different audience, addresses a different set of needs, but both are driven by the same belief: that skills development, done with integrity and care, is one of the most powerful tools for social and economic transformation available to us.

PILLAR ONE

FOR YOUTH, SCHOOL LEAVERS & UNEMPLOYED YOUNG PEOPLE

Because Potential Doesn't Expire.

If you are reading this and you have just finished school, or you have been job-hunting for months with nothing to show for it, or you have potential that the world simply hasn't had the chance to see yet, this is for you.

Azibuye's youth division exists because we refuse to accept that a young South African's future should be determined by the quality of the school they attended, the suburb they grew up in, or the connections their family does or doesn't have.

Talent is equally distributed in this country. Opportunity is not. We are here to close that gap.

Our programmes for youth and school leavers are built on a simple but radical idea: that practical, accredited skills delivered in an environment where you feel respected and valued can change the trajectory of a person's entire life.

We have seen it happen. We will keep making it happen.

FOR YOUTH SCHOOL LEAVERS & UNEMPLOYED YOUTH

Early Childhood Development (NQF 4 & 5)

NEMISA Digital Skills Programme

Microsoft 365 Productivity Programme

New Venture Creation

Data Science & Software Development

WHAT IT OPENS FOR YOU

Become a qualified ECD practitioner and shape the minds of South Africa's youngest generation.

Build real digital literacy, from social media to coding basics, to compete in the digital economy.

Master the tools every workplace uses Word, Excel, Teams, Outlook, OneDrive and more.

Learn to start and run your own business with practical entrepreneurship skills.

Step into the fastest-growing careers of the 21st century. (Accreditation in progress.)

PILLAR TWO

FOR CORPORATES, ORGANISATIONS & GOVERNMENT

Build the Workforce Your Business Deserves.

Your people are your greatest competitive advantage. But only if they have the skills, the confidence, and the credentials to perform at the level your organisation needs. Azibuye's corporate division exists to make that possible, through accredited, SETA-aligned, genuinely transformative training that you can be proud of.

We understand the pressures corporates face: B-BBEE scorecard requirements, SETA compliance, the need to demonstrate skills development that is more than box-ticking. We have built our corporate offering specifically to address all of those needs, while delivering training that your employees will actually value and remember.

From bespoke Microsoft 365 workplace productivity programmes to capacity building for educational institutions and government departments, Azibuye offers a partnership model built on transparency, accountability, and results you can measure.

FOR CORPORATES ORGANISATIONS & GOVERNMENT

Microsoft 365 Workplace Programme

Digital Skills Programme [HEMISA]

Capacity Building for Certificate Programmes

B-BBEE Aligned Learnerships

Bespoke Organisational Training

WHAT IT DELIVERS

Immediately applicable digital productivity skills for your entire team customisable to your needs.

Build digital fluency across your workforce, from foundation to intermediate competency.

Equip academic managers and lecturers for successful implementation of QCTO programmes.

SETA-compliant programmes that strengthen your scorecard and genuinely develop your people.

Custom training solutions designed around your specific sector, team, and transformation goals.

We don't measure success by the number of certificates we print.

We measure it by what your people can do the day after they graduate.

CREDENTIALS & ACCREDITATION

Qualifications You Can Trust

In South Africa's skills development landscape, accreditation is everything.

It is the difference between a training certificate that means something and a piece of paper that means nothing. At Azibuye eSkills, our accreditation is the foundation of our promise to every learner and every client.

Training Practice Registration
